## SEMICOA Aligns with ALL TECH for Distribution

Mon Oct 19, 2009 2:51pm EDT

COSTA MESA, Calif.--(Business Wire)--

Semicoa Corporation has entered into an agreement with All Tech Electronics to distribute Semicoa products and parts nationally. All Tech has over 50 years experience in the military, high rel and space component and application business. Their experience in distributing and stocking Semicoa's product line of bipolar diodes, transistors, and upcoming MOSFETs and IGBTs for the defense and aerospace industry will provide full service solutions and the expertise to solve and manage client challenges. Semicoa VP of Channel Sales, Kathleen Whitcher stated, "We are very pleased to have an organization like All Tech on board to handle the increased demand in sales. I have worked with them in the past and they are one of the best in the industry. We look forward to a strong and productive relationship with them to satisfy our client needs."

Semicoa is currently expanding product, staff, equipment, production capabilities and capacity to meet the growing demand of their customers for high reliability, standard and customer specific products. All Tech Electronics handling of distribution will play a major role in Semicoa's escalating sales. "We are looking forward to working with Semicoa and the Defense community to promote their world class product offering. In addition to many new products Semicoa will be developing," stated Mike Sammarco, Vice President of All Tech Electronics. "Semicoa offers our customers the opportunity to maintain a competitive environment for established products. All Tech is excited to be part of what is sure to be an increasingly significant supplier to our defense community."

All Tech Electronics is a certified minority owned and operated military component specialist and is certified by the U.S. Small Business Administration (SBA) and the National Minority Business Council (NMBC).

For Release 9 a.m. EDT, May 5th, 2009

Semicoa is a leader in the design, development and manufacture of discrete semiconductors and silicon photodiodes for high reliability military/aerospace and commercial markets. Semicoa's product offering includes a complete line of standard products and customer specific devices. Headquartered in Southern California, Semicoa has design, development and manufacturing facilities with a history of achieving the highest government qualifications (JANS MIL-PRF-19500 space level) and is ISO 9001 certified. The manufacturing facility includes design, fabrication, assembly and test.
