RE: Semicoa COVID-19 Announcement

To Whom it May Concern

Semicoa manufactures discrete semiconductor products for key markets such as Defense and Aerospace. Key sectors such as Defense are considered part of the Critical Infrastructure under Federal and State of California Executive Order N-33-20 (augmented by the State Public Health Officer) with orders both issued on March 19, 2020.

As a result, all Semicoa operations in the US are currently fully operational to support Critical Infrastructure sectors and Essential Businesses and is permitted to remain operational under the Shelter-in-Place orders currently in effect. While Semicoa will actively and continuously monitor COVID-19 outbreak and its evolution, we have reduced on-site staff by staggering shifts and have encouraged a great number of our team to work remotely and telecommute to adhere to social distancing at workplaces. In addition, we have implemented a series of measures and protocols in accordance with CDC guidelines to minimize the risk of COVID-19 transmission in all its operations to safeguard the health and safety of its employees and our communities, clients and suppliers.

Furthermore, business travel is restricted except in emergency situations and access to our facility has been restricted and any clients and suppliers visiting our facilities will require prior approvals.

Should you have any questions or require further information, please feel free to contact us.

Sincerely,

**John Park
Vice President and General Manager**
