

What You Get

An AS9120 & ISO 9001:2008 **FRANCHISED** Certified SDB
Providing products and services to the following standards:

MIL-PRF-38534 & MIL-PRF-38535 - For solder coverage;

GEIA-STD-0006 - Requirements for robotic solder finish on
Electronic Components;

IPC/ANSI J-STD-001 - For Trim and Forming and Hot
Solder Dip;

IPC/ANSI J-STD-002 - For Solderability Test;

ANSI STANDARD EIA-481 - For Tape & Reeling

Products and Services

Diodes

simplifying DISTRIBUTION

25 YEARS
1993-2018

performance
quality
support

Since our inception more than 25 years ago, All Tech
has become the most recognized SDB Distributor serving
the defense and aerospace community.

We have established ourselves as a franchised
stocking distributor and DMS Obsolescence solutions
provider, specializing in military grade and high reliability
semiconductor products.

Our goal has always been to provide our customers with
an SDB business partner that doesn't require them to
compromise quality or price.

DMS & Obsolescence Solutions

**ALL TECH
ELECTRONICS**
simplifying DISTRIBUTION

all technology

serving the component and value added needs
of the defense and aerospace customer

***your certified small disadvantaged
business partner***

 **all technology**
Committed to excellence

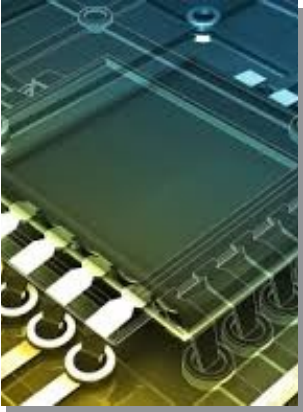

Solutions that work for your business.

COMMITTED TO EXCELLENCE

Since 1993; A franchised stocking distributor and DMS Obsolescence solutions provider, specializing in military grade and high reliability semiconductor products.

SUPPORT SOLUTIONS

- FRANCHISED DISTRIBUTION
- VALUE ADDED SERVICES
- CUSTOM PACKAGING.
- CUSTOMER PROGRAMS
- PROGRAM MANAGEMENT

All Tech Electronics offers solutions to our customers that have an obsolescence issue by providing a qualified drop in replacement on products that are obsolete or near end of life.

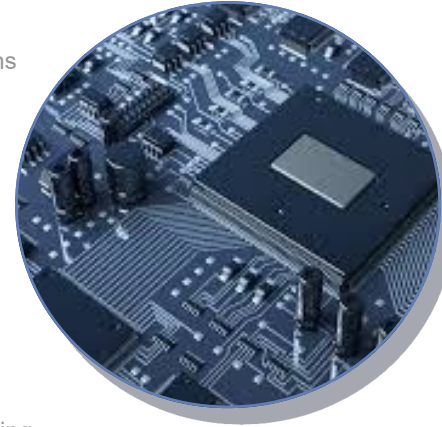

making obsolescence obsolete

DMS Obsolescence Solutions

- Commercial, Industrial, Military and Space Level Solutions
- Multiple Package & Assembly Options
- Full electrical test from -55°C to 200°C +
- Fully Traceable DIE **exclusively** from OCM
- Options using OCM components only
- Mitigates “Counterfeit Mitigation”
- **Solution evaluation units may be available**

Custom Packaging, Assembly and Test

- QML Certified MIL-PRF-38535 & 38534 Sources
- Die/Wafer Banking and Package level Testing/up-screening
- Full custom silicon ASIC/Hybrid assembly and test (Trusted facility)
- FPGA to ASIC conversions
- Full Test and Foundry Services Available (Trusted Options Available)
- Full Value added services program from Reballing to Tape and reeling

Semiconductor Services

All Tech Electronics offers our business partners a reliable, quality alternative to in-house resources.

All Tech will work with multiple resources and their combined capabilities to get our customer a finished solution..

Working with All Tech is a professional way to develop new resources rather than working completely in-house with your own people.

Bill of Material Analysis

Obsolescence Management incorporating all of the key ingredients required for program supportability. Complete life cycle management and software processes meet your specific program requirements.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?
