

E3PC

Three-Phase, Zero Cross Solid State Relays

Description

The **E3PC** series is engineered to effortlessly manage diverse loads like heating elements, motors, and transformers. Capable of handling voltages of up to 600 VACrms, this relay incorporates a built-in varistor to ensure robust transient protection, making it suitable for demanding industrial applications.

Enhancing reliability and load cycle capacity, three semiconductor power units are directly soldered onto the direct copper bonded (DCB) substrate. This SSR series offers both AC and DC-controlled versions, accompanied by a built-in LED status indicator for monitoring the applied control voltage and an optional overtemperature alarm.

Spanning a range of load currents reaching up to 75 AACrms, this series caters to various power requirements with efficiency and durability.

Main Features

- 3-phase Solid State Relay
- Zero switching
- Rated operational current: 3 x 25, 55 or 75 A
- Rated operational voltage: Up to 690 VAC
- Control voltage, 4-32 VDC or 24-275 VAC
- Integral snubber network
- Built-in varistor
- Over-temperature protection option with alarm output
- IP 20 back-of-hand protection
- LED indication of control input and over-temperature alarm status

Applications

- Plastic extrusion machines
- Thermoforming machines
- Coffee machines
- Electrical ovens
- Vending machines
- Soldering ovens
- Dryers
- Climatic chambers
- IR handling units
- Plastic sealing machines
- Shrink tunnels, etc.

Part Numbering System

Code	Option	Description
E3PC		Product Series
-	40	Operational Voltage Range: 24-440 VAC
-	60	Operational Voltage Range: 42-660 VAC
-	D	Control voltage: 4-32 VDC
-	A	Control voltage: 24-275 VAC, 24-50 VDC
-	25	25A Rated Load Current
-	55	55A Rated Load Current
-	75	75A Rated Load Current

Example: **E3PC 60 D 55**

Performance

Mains Supply

	E3PC40..	E3PC60..
Operational Voltage Range	24-440 VAC	42-660 VAC
Operational Frequency Range	45 to 65 Hz	
Blocking Voltage	800 Vp	1600 Vp
Overvoltage Category	III	

Input Specifications

	E3PC..D..	E3PC..A..
Control Voltage	4-32 VDC	24-275 VAC/24-50 VDC
Pick-Up Voltage	3.8 VDC	18 VAC/20 VDC
Drop-Out Voltage	1.2 VDC	9 VAC/DC
Input Current	≤ 23 mA	≤ 15 mA
Response Time Pick-Up Power Output = 50 Hz	10 ms	20 ms
Response Time Drop-Out Power Output = 50 Hz	10 ms	30 ms

Output Specifications

	E3PC..25..	E3PC..55..	E3PC..75..
Rated Operational Current AC 51 @ T _a = 25°C AC 53a @ T _a = 25°C	25 Arms	55 Arms	75 Arms
	5 Arms	15 Arms	20 Arms
Min. Operational Load Current	150 mArms	250 mArms	400 mArms
Rep. Overload Current t=1 s	37 Arms	< 125 Arms	< 150 Arms
Non-rep. Surge Current t=10 ms	325 Ap	600 Ap	1150 Ap
Off-State Leakage Current	< 3 mArms		
I ² t for Fusing t=10 ms	525 A ² s	1800 A ² s	6600 A ² s
Critical dV/dt Off State min.	≥ 500 V/μs		
On-State Voltage Drop	< 1.6 Vrms		

Thermal Data

Operating Temperature	-30° to +80°C (-22° to +176° F)
Storage Temperature	-40° to +100°C (-40° to + 212° F)
Maximum Junction Temperature	+125°C (+ 257°F)

General Specifications

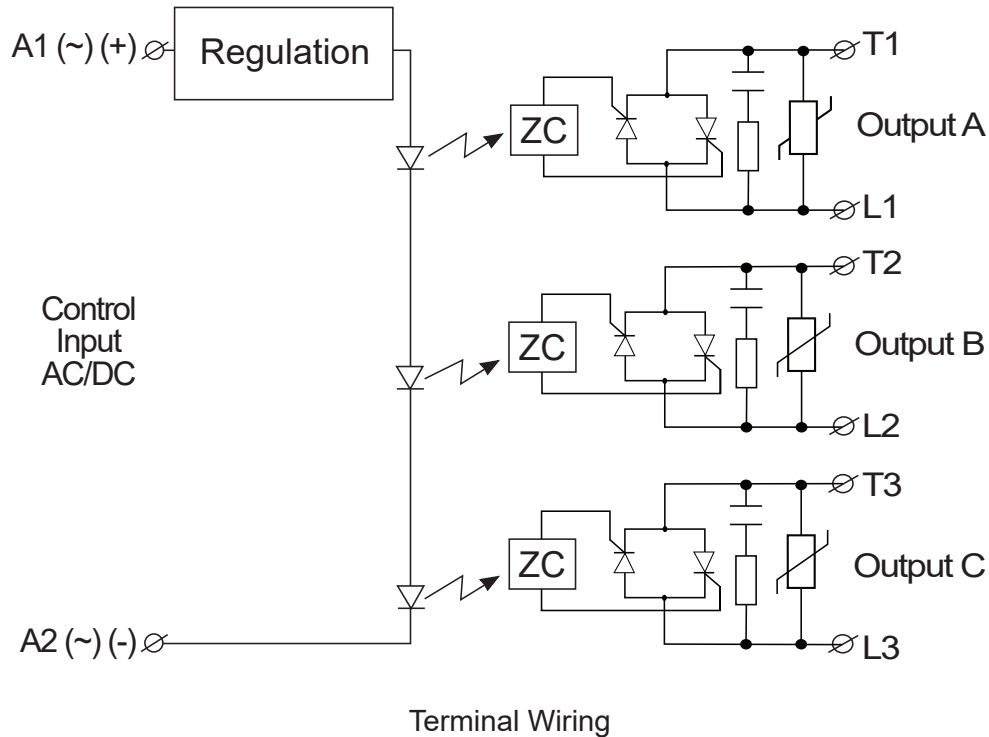

Housing Material	Noryl, black
Potting Material	Polyurethane
Base Plate	25, 55A: aluminum, nickel-plated 75A: copper, nickel-plated
Pollution Degree	3
Rated Isolation Voltage	Input to output: 4000 VACrms Output to case: 4000 VACrms
Weight	Approx. 380 g

Dimensions

○ Relay On LED

Electromagnetic Compatibility (EMC) - Emissions	
Radio Interference Field Emission (Radiated)	EN 55011 Class A: from 30 to 1000 MHz
Radio Interference Voltage Emissions (Conducted)	From 0.15 to 30 MHz EN 55011 Class A (industrial) with filters

*CSA approval for 75 A models (E3PC..75.) is limited to 65 A @ 40°C.

Note:

- Performance Criteria 1 (PC1): no degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (PC2): during the test, degradation of performance or partial loss of function is allowed. However when the test is complete the product should return operating as intended by itself.
- Performance Criteria 3 (PC3): temporary loss of function is allowed, provided the function can be restored by manual operation of the controls.
- Control input lines must be installed together to maintain products' susceptibility to Radio Frequency interference.

Environmental Specifications

EU RoHS Compliant	Yes
China RoHS	

The declaration in this section is prepared in compliance with People's Republic of China Electronic Industry Standard SJ/T11364-2014: Marking for the Restricted Use of Hazardous Substances in Electronic and Electrical Products.

Part Name	Toxic or Harardous Substances and Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
Power Unit Assembly	x	0	0	0	0	0

O: Indicates that said hazardous substance contained in homogeneous materials for this part are below the limit requirement of GB/T 26572.

X: Indicates that said hazardous substance contained in one of the homogeneous materials used for this part is above the limit requirement of GB/T 26572.

Short Circuit Protection

Protection Co-ordination, Type 1 vs Type 2:

Type 1 protection implies that after a short circuit, the device under test will no longer be in a functioning state. In type 2 coordination, the device under test will still be functional after the short circuit. In both cases, however the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors or terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in the table hereunder are suitable for use on a circuit capable of delivering not more than 65,000 Arms Symmetrical Amperes 600 Volts maximum when protected by fuses. Tests at 65,000 A were performed with Class J fuses, fast acting; please refer to the table below for maximum allowed ampere rating of the fuse. Use fuses only.

Tests with Class J fuses are representative of Class CC fuses.

Protection co-ordination Type 1 according to UL 508				
Part No.	Prospective Short Circuit Current (kArms)	Max Fuse Size (A)	Class	Voltage (VAC)
E3PC...25	65	30	CC	600
E3PC...55		50	J
